Antibiotic Treatment Recommendations

Class	Drug	Dose	ADR	Comments	Cost
Macro-lides	Azithromycin	Adults 500mg on day 1 then 250 on days 2-5 Children 12mg/kg/day X 5 days.	Lower GI effects than Eryth.	Available in susp. Less likely to interact with other meds.	\$\$
	Clarithromycin	Adults 250mg BID X10d days Children 15mg/kg/day Divided Bid X 10 days.	Lower GI effects than Eryth.	Available in susp. ↑Clarithromycin: Atorvastatin, Lovastatin, Simvastatin, prednisone, theophylline.	\$\$

Pharmacotherapy of Infectious Diseases A Case-Based Approach

Figure 1. Trial design and number of patients in each arm receiving and not receiving antibiotics

RADT—rapid antigen detection test, STDR—sore throat decision rules.

Adults who are at increased risk for strep throat include: Parents of school-aged children Adults who are often in contact with children Close contact with another person with strep throat is the most common risk factor for illness. 2016;164(6):425-434. If you look in a mirror, the back of your throat may be very red, and you might see white patches on your tonsils. Antibiotics can help people with strep throat feel better faster and prevent spreading it to others. Antibiotics are important for F-throat. Someone with strep throat may also have a rash; when this happens it is known as scarlet fever (scarlatina). Antibiotics help prevent spreading the infection to others People with strep throat should stay home from work, school, or daycare until they: No longer have a fever AND Have taken antibiotics for at least 12 hours Take the prescription exactly as the doctor says to. Your health care provider must do a test to diagnose strep throat and decide whether to prescribe antibiotics. A rapid strep test can be done in most provider offices. Certain other antibiotics may also work against the strep bacteria. Different antibiotic treatments for group A streptococcal pharyngitis. In: Kliegman RM, St. Geme JW, Blum NJ, Shah SS, Tasker RC, Wilson KM, eds. Adults are generally not at risk of getting rheumatic fever following a strep throat infection. Having strep throat does not protect someone from getting it again in the future. A rapid antigen test done at your doctor's office can find bacteria from the swab in minutes, so you can find out if strep throat is causing your symptoms. Complications may include: Contact your provider if you or your child develops the symptoms of strep throat. But if you don't start feeling in a day or two, make sure you call your doctor. Children may have headache and stomach pain. If the test is positive, doctors can prescribe antibiotics. The rash may feel rough like sandpaper. In: Bennett JE, Dolin R, Blaser MJ, eds. Be sure to tell your doctor if you're allergic to some antibiotics, so you can receive a different medication. Philadelphia, PA: Elsevier; 2020:chap 409.van Driel ML, De Sutter AI, Habraken H, Thorning S, Christiaens T. Last reviewed on: 7/19/2021 Reviewed by: Linda J. Culture is important to use in children and teens since they can get rheumatic fever from an untreated strep throat infection. Use an alcohol-based hand rub if soap and water are not available. You will probably have a fever very quickly, and your throat will be very sore. Many other causes of sore throat may have the same symptoms. The most common symptoms of strep throat include: Sore throat that can start very quickly Pain when swallowing Fever Red and swollen tonsils, sometimes with white patches or streaks of pus Tiny, red spots (petechiae — pronounced pi-TEE-kee-eye) on the roof of the mouth (the soft or hard palate) Swollen lymph nodes in the front of the neck Other symptoms may include a headache, stomach pain, nausea, or vomiting — especially in children. While you wait for the antibiotics to start fighting the infection, you can follow these tips to help your throat feel better: Drink warm liquids like tea with honey; Gargle several times a day with a teaspoon of salt in a cup of warm water; Drink cold liquids, or suck on popsicles, hard candies, or throat lozenges; Keep a vaporizer or humidifier running in your room to soothe the dryness in your throat AND Take over-the-counter pain medicines. Untreated, strep can lead to serious complications. You may start to feel sick a few days after you come into contact with the bacteria that causes strep throat, but usually people will start feeling sick suddenly. 2016;9:CD004406. It is most common in children 5 through 15 years old. A sore throat should be treated with antibiotics only if the strep test is positive. I call it F-throat. While there is no guidance on taking antibiotics on CDC's Antibiotic Do's & Don'ts Page. You should also wash glasses, utensils, and plates after someone who is sick uses them. Cochrane Database Syst Rev. Symptoms appear about 2 to 5 days after coming in contact with the strep germ. A throat culture takes time to see if group A strep bacteria grow from the swab. These settings include: Schools Daycare centers Military training facilities Up to 3 in 10 children with a sore throat have strep throat About 1 in 10 adults with a sore throat has strep throat A doctor will determine what type of illness you have by asking about symptoms and doing a physical exam. Flores AR, Caserta MT. Call the doctor if you or your child are not feeling better after taking antibiotics for 48 hours. Because strep throat can occasionally lead to rheumatic fever, antibiotics are given. If a carrier gets a sore throat illness caused by a virus, the rapid strep test can be positive. Philadelphia, PA: Elsevier; 2020:chap 59.Harris AM, Hicks LA, Qaseem A; High Value Care Task Force of the American College of Physicians and for the Centers for Disease Control and Prevention. 21st ed. Structures of the throat include the esophagus, trachea, epiglottis and tonsils. Mandell, Douglas, and Bennett's Principles and Practice of Infectious Diseases. Strep throat is most common in children between ages 5 and 15, although anyone can get it. Strep throat is spread by person-to-person contact with fluids from the nose or saliva. Most people with strep can spread the infection to others until they have been on antibiotics for 24 to 48 hours. These bacteria are contagious. Most people get sore throats from a viral infection, in other words, the common cold. Like with germs that cause a cold, you can also get strep throat from handling a doorknob or other surface, then touching your nose or mouth. They should stay home from school, daycare, or work until they have been on antibiotics for at least a day. Get a new toothbrush after 2 or 3 days, but before finishing the antibiotics. Antibiotics should be taken for 10 days, even though symptoms are often gone within a few days. The following tips may help your sore throat feel better: Drink warm liquids, such as lemon tea or tea with honey. Gargle several times a day with warm salt water (1/2 tsp or 3 grams of salt in 1 cup or 240 milliliters water). Drink cold liquids or suck on fruit-flavored ice pops. Suck on hard candies or throat lozenges. The test quickly shows if group A strep is causing the illness. Someone with strep throat should start feeling better in just a day or two after starting antibiotics. Wash your hands often with soap and water for at least 20 seconds. Find A Doctor Conditions We Treat Specialties Locations Your Visit Send a custom card to a child you know or brighten any child's stay with a smile by sending a card. Vorvick, MD, Clinical Associate Professor, Department of Family Medicine, UW Medicine, School of Medicine, University of Washington, Seattle, WA. It commonly spreads among family or household members. It may then spread over the body. Cough or sneeze into your upper sleeve or elbow, not your hands, if you don't have a tissue. Sometimes when you have a sore throat, it's more than just a normal cold, especially if your throat feels raw or like it's on fire. Also reviewed by David Zieve, MD, MHA, Medical Director, Brenda Conaway, Editorial Director, and the A.D.A.M. Editorial team. A rapid strep test involves swabbing the throat and running a test on the swab. Also, keep your family's toothbrushes and utensils separate, unless they have been washed. If repeated cases of strep still occur in a family, you might check to see if someone is a strep carrier. It is very rare in children younger than 3 years old. It doesn't show up on strep tests, so it's important to keep in mind with severe sore throats or sore throats that aren't getting better as expected. These items are safe for others to use once washed. Clin Infect Dis. They may be mild or severe. There's another common type of bacteria that can cause throat infections, especially in young adults; The bacteria's name is Fusobacterium necrophorum. How do you know for sure that you have strep throat? Either penicillin or amoxicillin are recommended as a first choice for people who are not allergic to penicillin. If they think you might have strep throat, they will swab your throat to test for strep throat. Crowded settings can increase the risk of getting a group A strep infection. But, occasionally, you might come down with strep throat, which is caused by a type of bacteria called Streptococcus pyogenes. Anyone can get strep throat, but there are some factors that can increase the risk of getting this common infection. Most sore throats are caused by viruses, not bacteria. Nelson Textbook of Pediatrics, 9th ed. It is an infection with a germ called group A streptococcus bacteria. The reason is because strep throat can sometimes lead to more serious health problems, such as rheumatic fever. Doctors treat strep throat with antibiotics. If someone keeps getting a sore throat after taking the right antibiotics, they may be a strep carrier and have a viral throat infection. PMID: 22965026 www.ncbi.nlm.nih.gov/pubmed/22965026/Tanz RR. 2012;55(10):e86-e102. In these cases it can be hard to know what is causing the sore throat. Otherwise, the bacteria can live on the toothbrush and reinfect you when the antibiotics are done. PMID: 27614728 www.ncbi.nlm.nih.gov/pubmed/27614728/. They are less likely to spread the bacteria to others and very unlikely to get complications. Acute pharyngitis. For Medical Professionals Quality Research Giving Careers Worried your sore throat may be strep throat? Also, call if symptoms do not get better within 24 to 48 hours of starting treatment. Family Resources & Education Learn more about the symptoms of Coronavirus (COVID-19), how you can protect your family, and how Nationwide Children's Hospital is preparing. Serious complications are not common but can happen Complications can occur after a strep throat infection. Carriers have strep in their throats, but the bacteria do not make them sick. However, the test may be negative, even if strep is present. Appropriate antibiotic

use for acute respiratory tract infection in adults: advice for high-value care from the American College of Physicians and the Centers for Disease Control and Prevention. There are two types of tests for strep throat: a rapid strep test and a rapid culture. Good hygiene helps prevent group A strep infections The best way to keep from getting or spreading group A strep is to wash your hands often. Common symptoms include:Fever that may begin suddenly and is often the highest on the second dayChillsRed, sore throat that may have white patchesPain when swallowingSwollen, tender neck glands Other symptoms may include:Some strains of strep throat can lead to a scarlet fever-like rash. Ann Intern Med. Since strep does NOT cause most sore throats, your doctor will make sure you have it before treating you for it. Symptoms of strep throat most often get better in about 1 week. Wash your hands often to help prevent germs from spreading. Sometimes, treating them can prevent others from getting strep throat. Talk to a doctor if you think you or your child may be a strep carrier. Doctors can do a quick test to see if a sore throat is strep throat. Benefits of antibiotics include: Decreasing how long someone is sick Decreasing symptoms (feeling better) Preventing the bacteria from spreading to others Preventing serious complications like rheumatic fever Someone who tests positive for strep throat but has no symptoms (called a “carrier”) usually does not need antibiotics. The following symptoms suggest a virus is the cause of the illness instead of strep throat: Cough Runny nose Hoarseness (changes in your voice that make it sound breathy, raspy, or strained) Conjunctivitis (pink eye) A sore throat that starts quickly, pain with swallowing, and fever are some of the common signs and symptoms of strep throat. Complications can include: People can get strep throat more than once. Antibiotics are taken to prevent rare but more serious health problems, such as rheumatic fever.Penicillin or amoxicillin are most often the first drugs to be tried. Pharyngitis - streptococcal; Streptococcal pharyngitis; Tonsillitis - strep; Sore throat strep Strep throat is a disease that causes a sore throat (pharyngitis). Clinical practice guideline for the diagnosis and management of group A streptococcal pharyngitis: 2012 update by the Infectious Diseases Society of America. This is especially important after coughing or sneezing and before preparing foods or eating. The same germ that causes strep throat may also cause symptoms of a sinus infection or an ear infection. For example, if someone has strep throat, the bacteria often spread to other people in their household. To practice good hygiene, you should: Cover your mouth and nose with a tissue when you cough or sneeze. Once you start treatment, your symptoms will probably be gone in about a week. Doctors can use other antibiotics to treat strep throat in people who are allergic to penicillin. In general, strep throat is a mild infection, but it can be very painful. You may also have a headache, be sick to your stomach, and feel chills. This can happen if the bacteria spread to other parts of the body. Infectious illnesses tend to spread wherever large groups of people gather. Put your used tissue in the waste basket. If the test is negative, but a doctor still suspects strep throat, then the doctor can take a throat culture swab. The rash first appears on the neck and chest. Your doctor will check your throat for redness, swelling, and white patches, then rub a sterile swab over your tonsils, taking a sample of mucus. Results will take 1 to 2 days. Strep throat often includes a fever (greater than 101 degrees Fahrenheit or 38.3 degrees Centigrade), white draining patches on the throat, and swollen or tender lymph glands in the neck. If the rapid strep test is negative and your provider still suspects that the strep bacteria is causing the sore throat, a throat swab can be tested (cultured) to see if strep grows from it. PMID: 26785402 www.ncbi.nlm.nih.gov/pubmed/26785402/.Shulman ST, Bisno AL, Clegg HW, et al. Young children should not be given these products because they can choke on them.A cool-mist vaporizer or humidifier can moisten and soothe a dry and painful throat.Try over-the-counter pain medicines, such as acetaminophen. For adults, it is usually not necessary to do a throat culture following a negative rapid strep test. If you do, your doctor will most likely ask you to take penicillin or amoxicillin for 10 days, even though you might feel much better after a few days. While it takes more time, a throat culture sometimes finds infections that the rapid strep test misses. Your doctor will probably send the swab to a laboratory to double check your diagnosis, but this test may take a day or two. It's important to see your doctor if you think you have strep throat, because, untreated, it can lead to very serious health problems.
